

KAMEL FAOUR

FULL STACK SOFTWARE DEVELOPER

Beirut, Lebanon | +961 71 605 349 | faour5kamel@gmail.com | [linkedin.com/in/kamel-faour](https://www.linkedin.com/in/kamel-faour) | github.com/kamel404

PROFESSIONAL SUMMARY

Full Stack Developer experienced in building web, mobile, and backend applications with Laravel, React, Flutter, and Node.js. Experienced in delivering e-commerce, fintech, and enterprise solutions for teams in Lebanon and the UAE, translating business requirements into reliable, production-ready software. Strong across the full development lifecycle, from API and database design to frontend and mobile development, with a focus on performance, maintainability, and delivering practical solutions that create real business value.

PROFESSIONAL EXPERIENCE

Full Stack Developer | WeaveWider

Mar 2026 – Jun 2026

Project Based — mobile e-commerce platform (Yubai)

- **Built core e-commerce features** for the Yubai mobile app (Flutter, Node.js, Laravel backend), including multi-currency and multi-language support and product data integration via Actowiz APIs, benchmarked against Amazon- and Sephora-style shopping experiences.
- **Integrated 3 payment and logistics gateways** (OMT, Wish, Stripe), rebuilt order tracking and shipment workflows, and optimized system architecture to support increased transaction volume without added latency.

Software Developer | DoorEast

Sep 2025 – Mar 2026

- **Shipped features across a Flutter mobile app and Angular web frontend**, resolving UI defects and adding functionality that improved day-to-day usability for end users.
- **Rebuilt the roles and permissions system in Laravel** and refactored API response handling, increasing backend response speed and reducing redundant payload size.
- **Built Python scraping and automation tools** to extract and normalize property data from documents and major real estate platforms, cutting manual data-entry time for the team.

Full Stack Developer | Forex-Flow Community

May 2025 – Aug 2025

- **Built real-time pip tracking and signal distribution features** (React, Laravel) for a live forex education platform, improving daily trader engagement.
- **Owned core modules for pip analytics and user management**, contributing directly to trader retention on the platform.
- **Applied Laravel architecture and React state-management best practices** under senior developer mentorship, strengthening code quality and scalability.

Frontend Developer | Smart Tech Company

May 2024 – Aug 2024

- **Built a fully functional AngularJS e-commerce web app** as part of internal training, implementing a responsive UI with modular, reusable components.
- **Delivered new features and UI improvements** for the company's proprietary ERP system, applying modern Angular/TypeScript design patterns to improve maintainability.

SPECIAL PROJECTS

AI Wakeel Insurance | Flutter, Laravel

Jul 2025 – Jul 2026

- **Architected a full-stack insurance & service booking application** supporting 8+ policy types, car rental, and travel marketplaces.
- **Streamlined broker operations** with in-app virtual wallet for real-time balance deductions, automated PDF generation, and secure RBAC.
- **Boosted user retention** by delivering dual-language localization (Arabic/English), dynamic premium pricing, and FCM push renewal alerts.

MU Connect | Laravel, React

Feb 2025 – Jun 2025

- **Built a university-wide community platform** connecting students across faculties for resource-sharing and collaboration.
- **Shipped modules for posts, events, discussions, and course management**, streamlining student affairs processes and campus communication.
- **Awarded Top Project of the University** for innovation and impact on campus engagement.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, PHP, Python, Java, C++, SQL
